## MICROPIGMENTATION

### EYEBROWS

Permanent makeup can create a lifting effect, by **raising otherwise “droopy” eyebrow arches**. I predominantly use a hair-stroke method, and can either give you a custom glamorous (super-model) look or a more natural look. Regardless of your choice, a well-crafted eyebrow is a true asset to your face.  
*\$425.- for both brows.*

### EYELINER

Eyeliner can be applied above or below the eyes, to make them appear larger. The effects of aging can often first be seen around the person’s eyes, including wrinkles, sagging, drooping, puffiness, hollowness, etc. Permanent makeup can drastically improve the appearance of the eyes, giving the person a **much more youthful expression**.  
*\$250 single or \$425 for both.*

### LIPS/LINER

What if you could have supple, **beautiful, colorful lips around the clock**? While some women are lucky enough to naturally already possess the “perfect” lips, many others are secretly frustrated by perceived “short-comings” in their lips, being too thin, too flat, too pale, not shapely, etc.  
*\$350 liner / \$450 full-lips.*

### SCALP

Scalp Micro-Pigmentation is for thinning hair, and will give the look of a full, youthful head of shortly-trimmed hair.

- restores hairlines on partly or fully bald heads
- camouflages symptoms of alopecia
- hides scars, burns, and birthmarks
- rejuvenates look of crown, gives realistic hairline
- ideal for progressive crown-thinning and balding

Diffused hair loss can affect both men and women at any age. Micro-pigmentation is **incredibly effective at restoring confidence and looks**. Suited for all skin-types and colors. Pigments can be matched with any existing hair. *From \$950.- to \$2,500.- dep. on coverage area (incl. 3 treatment sessions).*

*All fees are due and fully payable on the day of the procedure. (\$50 deposit for scheduling required) Credit or Debit cards, Cash, Money Orders or PAYPAL. NO CHECKS.*

## BEFORE & AFTER

### EYEBROWS

### LIPS/LINER

### REJUVENATION

### SCAR REVISION

*Individual results may vary.*

*Sometimes more than one treatment is necessary.  
Eligibility requirements determined at initial consultation.*

## CLINICAL MICRONEEDLING

### REJUVENATION

As one gets older, the skin begins to lose its natural elasticity, which results in the formation of wrinkles, skin sag, stretch-marks, and uneven skin-tone (pigmentation). A skin rejuvenation treatment results in:

- reduction in the amount of lines and wrinkles
- improved overall skin elasticity
- more even skin complexion, smaller pores, better tone
- reduction in skin damage from environmental factors

With clinical microneedling, the skin will brighten and gain a more healthy, youthful appearance. It is suitable for all skin-types and -tones. The body responds to this treatment by the production of elastin and collagen fibers, as well as new capillaries (blood vessels) to improve blood circulation, which leads to a healthier plumping of the skin, and better overall appearance. Any part of the body covered by skin can be treated, not just the face and neck.

### SCAR REVISION

A scar is formed when the injury reaches the deeper layers of the skin structure. Scars can be caused by acne, surgery, burns, mole removals, etc. Microneedling is a new technique whereby the scar-tissue is gradually broken down and assimilated into the surrounding tissues, reducing appearance and severity of the scar:

- scars will become flatter, softer and more even-toned
- red and dark-colored scars will fade and blend in
- tension and pain associated with the scar will be reduced
- scars can be treated regardless of their age (min. 12 mts)

*Individual results may vary.*

*Typically, 3 treatment sessions are necessary.  
Course of treatment determined at consultation.*
